

INTERNET REDUNDANCY & OPTIMIZATION SERVICES

echots.com | sales@echots.com | 415.857.3246

GOAL:

To achieve uninterrupted & redundant internet connectivity with seamless failover, intelligent load balancing to ensure important traffic is prioritized, and high-quality internet services are maintained.

SOLUTION:

Implement a cost-effective SD-WAN technology that features Internet redundancy & optimization services.

PARTNERSHIP: ECHO has been a partner with Bigleaf since 2015 to provide clients internet performance and necessary redundancy to ensure a smooth business operation.

RESULTS:

- Realize 100% quality internet service
- Improve Quality of Service of Voice, video and enterprise cloud application performance by introducing AI load balancing and by prioritization intelligence
- Seamless failover when internet provider experiences outage or temporary impact
- No interruptions due to poor internet quality
- Boost and improve user productivity

Digital transformation for small businesses and non-profit organizations.
