

INTERNET ONLINE PRIVACY

echots.com | sales@echots.com | 415.857.3246

GOAL:

Increase Internet Online Privacy to protect from displaying personal online information and from third-party data breach.

SOLUTION:

Implement NordVPN, a VPN service that protects internet connection and privacy online. It creates an encrypted tunnel for data, protects online identity by hiding the IP address, and allows to use public Wi-Fi hotspots safely.

PARTNERSHIP:

ECHO has been a partner with NordVPN since 2018 providing clients internet protection and redundancy necessary to ensure organizations are online secured.

RESULTS:

- Easy Agent installation with instant online privacy protection.
- Increase cybersecurity protections
- Eliminate hackers attempting to monitor privacy data and online engagement.
- Ensure encrypted online traffic when using public Wi-Fi services.

Digital transformation for small businesses and non-profit organizations.
